DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the amendment must be provided in a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, the references mentioned in the amendment have not been considered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 3 and 4 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling as of the description of the general shape of the device, does not reasonably provide enablement for energy regenerating feature. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The specification does not disclose the "the energy regenerating" feature, does not describe what kind of energy, how that energy is generated, how it is transmitted to the electronic equipment associated with the device and means that are affected by alleged "energy regeneration".

3. Claims 3 and 4 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a credible asserted utility or a well-established utility.

The disclosure does not substantiate "the energy regeneration" feature of the device, does not provide scientific basis for the claims.

The claimed invention is not supported by either a credible asserted utility or a well established utility for the reasons that there is not conclusive evidence of the improving quality of performance of the audio and video equipment as claimed.

Claims 3 and 4 have not been considered on the merits because of the rejection under 35 U.S.C. 101 and under 35 U.S.C. 112, first paragraph. The prior art listed in US PTO 892 Form, which may be related to the subject matter, disclose radiating energy devices having conical shape and including spiral or helical elements.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
